STIC SEARCH RESULTS FEEDBACK FORM

Biotech-Chem Library

Questions about the scope or the results of the search? Contact the searcher or contact:

Mary Hale, Information Branch Supervisor Remsen Bldg. 01 D86 571-272-2507

Vol	luntary Results Feedback Form
>	I am an examiner in Workgroup: Example: 1610
>	Relevant prior art found, search results used as follows:
	☐ 102 rejection
	103 rejection
	Cited as being of interest.
	☐ Helped examiner better understand the invention.
	Helped examiner better understand the state of the art in their technology.
•	Types of relevant prior art found:
	☐ Foreign Patent(s)
	Non-Patent Literature (journal articles, conference proceedings, new product announcements etc.)
>	Relevant prior art not found:
	Results verified the lack of relevant prior art (helped determine patentability).
	Results were not useful in determining patentability or understanding the invention.

Protein Rush Search for Serial No. 10/681,690

I would like to request a Rush Search for Serial No. 10/681,690 as listed below since it is an amended case filed 10/08/2003. Thank you.

Christian Fronda Art Unit 1652 Mailbox REM 2C70 Office REM 2D78 (517)272-0929

Please perform sequence search for Serial No. 10/681,690

- 1. Please search SEQ ID No: 4 against amino acid commercial, PGPub, and issued databases.
- 2. Please perform **OLIGO search** for SEQ ID NO: 4 against amino acid commercial, PGPub, and issued databases...
- 3. Please SEQ ID No: 3 against amino acid commercial, PGPub, and issued databases.

Please save on <u>COMPUTER DISKETTES</u>.

Thank you very much.

Christian Fronda Art Unit 1652

Protein Sequence Searches - February 2005

All of the sequence databases on ABSS have recently been updated.

- Please note that the curators of the UniProt database have purged some temporary accession numbers from the most recent version of UniProt. These sequences have been assigned new permanent accession numbers. The new UniProt record may not contain the previous temporary accession number.
- If you encounter an accession number from an older search run against UniProt (results file extension .rup) that can no longer be found in the database, the permanent record with the new accession number can be found by searching the old accession number in the UniProt Protein Archive database (UniPARC) at:

http://www.pir.uniprot.org/database/archive.shtml

If you have any questions regarding this information or your results, please contact any STIC searcher.

When submitting sequence search results for scanning into IFW, please include a copy of this attachment to assist any future Examiners or members of the public who may encounter UniProt temporary accession numbers.
